CareerNest

Career guidance that follows the student, step by step

Group: Rowders

Live demo: careernest-bn5l.onrender.com

01

The problem

Choosing a career in Myanmar is mostly guesswork.

Students decide alone, with too little information

Grade 12, GED and IGCSE students face one of the biggest decisions of their lives with scattered advice.

1

No structured guidance

School counselling is rare. Advice comes from family, friends and social media rather than from the student's own interests.

2

Scattered information

University, major and admission details sit in separate places and are hard to compare side by side.

3

Few people to ask

Most students never speak with someone already working in the field they are considering.

4

Decisions are not kept

Whatever a student works out gets lost. There is no plan to come back to and adjust.

02

Our solution

One guided journey from interests to a written plan.

CareerNest turns a vague question into a concrete plan

A career guidance web app for Myanmar students that matches interests to careers, opens up universities and majors, adds AI coaching and real mentors, and saves the whole journey as a plan the student owns.

Interest quiz | Career matches | University discovery | AI coach | Mentors | Personal plan

How the journey works

Each step unlocks the next, so no one is left staring at an empty dashboard.

1

Choose a level

Grade 12, GED or IGCSE sets the data the student sees.

2

Take the quiz

20 questions produce career matches and a Holland code.

3

Pick a career

Review matches, watch short career videos, choose a direction.

4

Explore and compare

Shortlist majors, then compare universities side by side.

5

Get the plan

Career, shortlist, mentor sessions and next steps in one place.

Matching, not guessing

The 20-question quiz produces a Holland code and ranked career matches rather than a single verdict.

- Results are explained, so the student understands why a career fits.
- Short career videos sit next to each match for a realistic picture of the work.
- Choices stay editable — changing an earlier answer reopens the steps that depend on it.
- Signed-in progress saves automatically and is there at the next sign-in.

20

questions to a ranked set of career matches and a Holland code

Universities and majors in one place

Once a career is chosen, CareerNest opens the paths that lead there.

- Majors related to the chosen career, shortlisted by the student.
- Universities and colleges with photos and admission-relevant detail.
- A side-by-side comparison of at least two options before the plan unlocks.
- Admins keep the university data current in the admin portal, and bulk-import from a CSV template.

3

education tracks supported: Grade 12, GED and IGCSE

An AI coach that knows the journey

The AI career coach and university advisor answer questions in the student's own context, not in a blank chat window.

- Signed-in students get a free allowance of AI questions; Pro removes the limit.
- A primary AI provider with an automatic fallback keeps the coach answering.
- Guests can explore careers, but AI, saved progress and mentors need an account.
- The Pro PDF report is generated in the browser, so it costs no AI calls.

AI

career coach and university advisor, with provider failover

Real mentors, booked in the app

The step no quiz can replace: talking to someone who has already walked the path.

- Mentors apply through the app and are reviewed by an admin before sign-in is enabled.
- Mentors publish their availability; Pro students book sessions directly.
- Booked sessions appear in the student's plan alongside the career and shortlist.
- The API checks Pro entitlement on every booking.

3

portals: student, mentor and admin, each with its own access

Built as a real product, not a demo

Three portals, role-based access and an admin team that runs the platform day to day.

1

Student portal

The guided journey, saved progress, AI coach, mentor booking and the Pro report.

2

Mentor portal

Applications, admin review, availability and the sessions a mentor has been booked for.

3

Admin portal

Payments, mentors, students, universities, content, payment accounts and admin roles.

4

Guest mode

Anyone can try the career flow first. Registering keeps the progress instead of losing it.

Technology

A conventional, maintainable stack — deployed and running today.

Frontend

React 19

TypeScript

Vite

Tailwind CSS

Client-side PDF (jsPDF)

Backend

Node.js

Express

TypeScript

JWT auth with role checks

Zod validation

Data and AI

PostgreSQL on Supabase

Versioned SQL migrations

AI provider + fallback

Vitest tests

Hosting

Render for web and API

Health endpoint

Seeded demo accounts

Separate deploy config

How it pays for itself

The core journey stays free. Pro covers the costs that scale with use.

- Free: quiz, career matches, university discovery, saved progress and a limited AI allowance.
- Pro: unlimited AI coaching, mentor sessions and the full PDF report.
- Payment is submitted in the app with a screenshot and approved by an admin after the money arrives.
- Membership runs one calendar month per approved payment and simply expires — no automatic charge.

5,000 Ks

per month for Pro, approved by an admin

Where we are and what is next

The product is live and usable end to end. The next steps widen reach and deepen the data.

Working today

Full student journey, guest to plan

Three portals with role-based access

AI coach with provider failover

Pro payments, monthly membership and PDF report

Deployed on Render with a live demo

Next

Wider university and scholarship coverage

Full Burmese-language experience

Mentor ratings and session feedback

Outreach through schools and tuition centres

Mobile-first polish for low-bandwidth use

Try it yourself

CareerNest is live. Open the demo, take the quiz, and follow the journey a student would.
